

I have a comment regarding the definition of stormwater as defined by 40 CFR Subpart 122.26(b)(14) which you have located in Appendix #1. To clarify what constitutes stormwater versus process water I think it would be helpful to place this definition further up in the permit, perhaps along with or near to the definition of process wastewater as found on page 13 of 58. (Is Appendix #1 referenced in the permit itself)? Could stormwater be better defined in Appendix #2 - Definitions, or at least the reference to 40 CFR Subpart 122.26(b)(14) be included here?

Thank you for the opportunity to comment.
